THESE periodicals are the critical censors of the British scholastic and literary world. By their criticans, they aid readers in the selection of standard valuable books; and by the epitomes which they present, often obvinte the necessity of consulting works too voluninous for general examination. They fill a place which American magazines cannot supply; for they discuss topics relating more strictly to the affairs, political, religious, and fiterary, of the Cominest of Europe. They are conducted by the best talent of Great Britain; and are engaged with the most important questions which interest or agitate the civilized world. Salt better than is made in this country, or imported.

The English use the French "Bay Salt," (solar evaporated.) The Dutch re-dissolve solar evaporated and further refine it before they use it. The people of this country alone use any and every kind that tastes salt! The Liverpool Salt is not used in England but to make Chlorine from, they finding it in the formulation of the same objection of the salting provisions; and the same objection to the same objection.

Talbot, Holly Springs; C. Morrison, Tuscaloosa, and by agents and Duggists generally throughout the Southern and Western States.

TAYLOR & McCARTHY, unfit for salting provisions; and the same objection lays against all boiled Salt; even the Turks Island and other solar evaporated Salt that is imported here contains all the lime that is in sea-water, amounting

to about twelve per centum of the solid matter, and lime instead of preserving meat decemposes it. At Key West, as in France, we deposit out the lime into resevoirs before crystalizing the Salt; and we feel convinced that after using our Salt, not only the Packer but the Planter and Farmer will use no other when they can get it; the antiseptic power of Kev West Salt being sertainly twelve per centum greater than Turks Island, even if the lime in the last named does not injure it, which it unquestionably does. All other Salt imported into this country much inferior to Turks Island; and if any con parison can be drawn between our Salt and Liverpool ours is at least fifty per centam better, weight for weight; besides our Salt weighs 84 to 86 lbs. per bushel, whereas Liverpool only weighs 50 to 56 lbs.

We keep on hand three kinds of Salt. First, the coarsest kind of packing Salt. Second, a finer kind, which

which is made in covered pans and is best for salting fish, &c. Third, the best Ground Salt, put in small bags, fitted for salting butter and for table use. PERILS OF NAVIGATION,

A Fair Test.

COME mouths ago, a Mrs. Walker, of Crawford county, Gar, came to Dr. Gorman with her little daughter, who was wretchedly affected with a sort of Tetter, covering not only her head and neck but extending to many parts of the body. Previous to coming to Macon, every remedy within their reach had been used without touching the case. In this condition Dr Little's Ringworm and Tetter Ointment was prescribed, and the result was, by the end of two weeks every vestige of the disease was entirely eradicated—a fact well understood, in the neighborhood.

Extraordinary Success.

Cutaneous affections, known as scald-heads, old or obstinate Tetters, and some others are extremely or obstinate Tetters, and some others are extremely difficst to cure—indeed, are incurable by most of the preparations physicians ordinarily prescribe.

From Dooly county an extraordinary case has been given, of a man who has had a chronic Tetter upon the chin and lower lip for fifteen years, that had resisted every thing—which has recently been cured by Dr. Little's Ringworm and Tetter ointment. It has been perfectly well for several months, though for years previous though to be incurable.
